

Name **Quản Bạ Seedless
Persimmon**

Country **Viet Nam**

Date of registration:
05/07/2017

Source: www.noip.gov.vn

Main characteristics/features

Quản Bạ seedless persimmon has round and uniform shape, glossy yellow and calyx of 4-5 large sepals attached to the fruit. The fruits are seedless and weigh 20 to 25 fruits per kilogram. The flesh is bright yellow, fragrant and sweet. The ripe fruit is rich in glucose: total sugar of 10.25 to 20.23% and tannin content of 0.14 to 0.48%.

Geographical area

Tam Sơn town, communes of Nghĩa Thuận, Thanh Vân, Bát Đại Sơn and Quản Bạ of Quản Bạ District, Hà Giang Province.

Production and processing

Variety: indigenous seedless persimmon variety. The trees are planted in January to February. They are ready for harvest when they reach 5 – 7 years old. Fruits are sorted and put into ceramic jars, plastic basin or styrofoam box filled with water for 40 – 60 hours to neutralize the acidity then left for dry. Persimmons which are dried for 10 hours after soaking will be sweeter and tastier.

Link between product and territory

The seedless persimmon trees are planted at the altitude of over 1,000m, on relatively flat terrains. The soil has a relatively high humus content, with good drainage and little erosion. The trees grow under cool weather conditions. Local farmers have made good use of their skills to bring about tasty Quản Bạ seedless persimmon.
