Main characteristics/features

Xín Mần Già Dui rice has slightly round shape with medium length, white colour and white belly. The bran coat is lightly brown. When cooked, Già Dui rice is very soft, having a distinctive aroma, high elasticity and different taste to other types of rice. Già Dui rice is at pinnacle in terms of nutrition content with carbonhydrates content of over 66 to 73% and protein content of 8.5 to 9.5%.

Geographical area

Communes of Thèn Phàng, Bản Dịu, Xín Mần, Chí Cà, Nàn Xín, Ngán Chiên, Trung Thịnh, Tà Nhiu, Chế Là, Bản Ngò of Xín Mần district, Hà Giang province.

Production and processing

Variety: Già Dui rice. Sowing season: 20 April to 20 May of the lunar calendar annually. Harvest season: October to November, when the rice are firm, matured and has a consistent yellow colour. The rice is then dried, rice husk and flopped rice are removed. The Nùng people plough the fields and stir up the soil when the harvest ends, nourish the soil with organic fertilizers to increase the amount of microorganisms in the soil.

Link between product and territory

Già Dui rice is planted in the Northwest of Xín Mần district, at an altitude of 800 to 1,200m above sea level. The rice is grown on the metamorphosed ferrallitic soils with soil texture from sandy loam to clay loam. The climate is tropical monsoon and highland sub-tropic.
