Production and processing

Link between product and territory

Bình Phước locals only reproduce cashew by cloning method at licensed facilities. The season for planting cashew is from June to late July. The season for harvesting Bình Phước cashew nuts is from February to June and the farmers must harvest 3 days after the fruits fall at the latest. Bình Phước cashew nuts are treated by saturated steaming. The tasty and crunchy roasted nuts are made by traditional firewood roast method.

The geographical area has the monsoon tropical climate, therefore it has high temperature throughout the year, which is a favourable condition for the development of cashew.
