Production and processing

Link between product and territory

Breed: Indigenous golden ox breed.
Ranging: Mainly confined. Oxes shall be fattened 2 – 3 months before butchering. The feed during the fattening consists of carbohydrate feed, mainly corn, and raw green feed of wild grass, vegetable from the forest and green corn stalks. Oxes shall be butchered at 36 – 48 months old. Butchered oxes shall be healthy, traceable and fattened for 2 – 3 months

The area where the oxes are raised is on the altitude of over 1,000 meters. As a result, the climate is cool all year round and the air is thinner. Therefore, oxes naturally have a higher Hemoglobin in their blood, resulting in a brighter red colour of the beef. The natural feed are thought to be herbs that make Hà Giang golden ox beef especially tasty and nutritious.
