Production/processing

Link between product and territory

At the beginning, the producers will choose firm, mature bulbs of 10 to 11 months old (neither too young nor too old) with shiny appearance to be the parent plant. They will also pick the suitable season with the misty nature of the area’s climate, regularly fertilize the root for better plant development or apply non-fertilize method for two to three years. Also, ginger producers of Kỳ Sơn district abide to the technical procedure for producing safe organic ginger.

Kỳ Sơn ginger’s peculiarity is thanks to the content of Molybdenum, Copper, Zinc, total Nitrogen, total Phosphorus, total Potassium, soluble Potassium, acidic level, and clay in the soil. Total Potassium and soluble Potassium contents are especially important to the formulation of Gingerol and essential oil contents.
