Main characteristics/features

Geographical area

Đắk Hà robusta coffee has many varieties, including coffee bean and other processed coffee products such as roasted coffee, coffee powder and coffee essence. Đắk Hà coffee has high caffeine, soluble carbohydrate and reducing sugar contents; the high fat content resulting in the rich taste; the high raw protein content resulting in compounds that have sweet and caramel taste; water-soluble content is high; raw fibre and ash content is low.

The communes of Xã Đắk Mar, Ngọc Wang, Hà Môn, Đắk Ui, Đắk La, Đắk Long, Đắk Pxi, Đắk Ngok, Ngọc Réo, Đắk Hring and Đắk Hà township of Đắk Hà district, Kon Tum province

Production/processing

Link between product and territory

Coffee berries are harvested when ripe, the harvest is done completely manually, picking each ripe berry or cluster without pulling unripe berries, leaves and twigs. The strict requirements regarding preparation, storage and processing of Đắk Hà coffee are the decide factor for the quality of the product.

The geographical area has a dense system of rivers, streams and lakes, the irrigation is varied with many large dams. Moreover, the soil has suitable physical and chemical properties for the development of coffee, which contributes to the peculiarity of coffee bearing the "Đắk Hà" GI.
