Production/processing

Link between product and territory

Phú Yên is a province with rich history of cultivating lobsters. The local fishermen have rich experiences in choosing cultivating area, feeding timing and techniques, preventing diseases, etc. which hightens the quality of Phú Yên lobsters, make them attractive to consumers.

The area is not influenced by wind, resulting in consistent water quality and temperature, highly suitable for aquacultural cultivation. The water is well circulated, abundant in oxygen as well as washing out wastes from cultivation activities. Additionally, the geographical area is a open area with many types of lifeform, including 53 types of phytoplankton, 51 types of zooplankton, 32 types of benthos with a variety of algae and microalgae. It is a favourable condition for marine lifeforms which are food sources for the lobsters.
