### Main characteristics/features

### Geographical area

Cầu Đúc pineapple is of Queen variety. It has vertical cylinder shape, deep yellow colour, multiple protruding eyes, deep eye holes, faint aroma, and sweet taste. The size of Cầu Đúc is large, the weight is 1.14 – 1.42 kg per fruit, the diameter is 13.20 – 17.65 cm, and the height is 16.46 – 20.74 cm. Each fruit has 113 – 117 eyes and the edible portion is 64 – 76 %. Additionally, Cầu Đúc pineapple has the following peculiarity: total soluble dry matter of 14.04 – 16.16 obx; total sugar content of 8.81 – 11.49 %; total acidic content of 0.52 – 0.78 %; and Vitamin C content of 27.70 – 37.70 mg/100 g.

Vinh Viễn A commune of Long Mỹ district; ward VII and the communes of Vị Tân, Hỏa Lựu, Tân Tiến and Hỏa Tiến of Vị Thanh city, Hậu Giang province.

### Production/processing

### Link between product and territory

The timing for planting pineapple is June to July for main season and October to November for off season harvest. The pineapple field also has dikes for flood and corrosion prevention, and wind shielding trees on the main line. When the plant has at least 55 leaves (equivalent to 8.5 months old), the producer will use CaC<sub>2</sub> to stimulate the blooming. Pineapple will be replanted after at least 2 seasons and at most 3 seasons. The harvest season of Cầu Đúc pineapple is February to March (main season) and July to August (off season).

The soil has heavy mechanical composition, good water retention, high porosity. Moreover, the soil for Cầu Đúc pineapple has high soluble cation and total organic carbon content at medium to rich, resulting in the sweet taste and juiciness of the fruit. Rainy season's average rainfall is 289.6 – 499.5 mm, during the nutrition accumulation of pineapple. Therefore, it directly impacts the size, weight, and water content of the fruit.
